

The solid fuel corner stove is an extension to the corner oil stove. The stove has been designed specifically for use on Narrow Boats and its triangular shape makes it suitable for fitting into corner locations. In its solid fuel set up it can burn logs as well but to set up the stove as

an out and out wood burner the additional wood grate should be fitted. The stove can be supplied as a water heater with a fully integral high output boiler and a water temperature sensing thermostat. *Silent simplicity just for you.*

## Features

- Triangular construction creates the most economical use of space.
- Fully adjustable door hinges and locks.
- Stay cool easy to use door handle.
- Stainless steel grate carrier, front fret and grate.
- The high chrome content of the stainless steel grate gives a much longer life.
