Oven

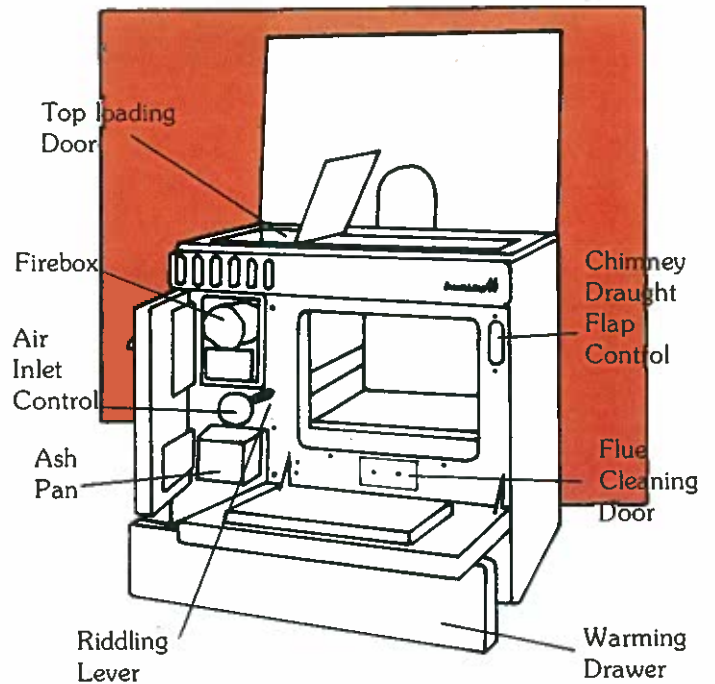

Franco Belge Mixed Fuel Cookers

Think... of French cooking with all its simple freshness and delicate flavours ; think... of a French cooker with all the traditional French virtues ; then think of being able to use the most economical and readily available fuels : wood, coal, peat or smokeless fuels ; of a constantly warm and friendly kitchen, of really hot water for all your needs. All this you can have with a Franco Belge 44 or 64 series cooker.

Special features for your Kitchen

- o The whole of the top surface, made of polished cast iron, forms a huge hot plate with high temperature for frying and areas of lower heat for simmering and slower cooking.
- o A large enamelled oven is evenly heated from five sides to ensure superb baking and succulent roasts.
- o A convenient warming drawer takes up the full width of the cooker.
- o A firebox big enough for really large logs will burn all kinds of fuel at maximum efficiency.
- o An adjustable air inlet controls the burning rate and heat output. Turn up the control to obtain maximum heat in only a few minutes. Turn it down for low heat. Turn it further to reduce the chimney draught as well as cutting off the air supply and the fire will slumber for well over 12 hours.
- o The 64.148 has the extra advantage of a back boiler to give you bathfulls of piping hot water for the whole family at almost no extra running cost.

When you own a cooker made by Franco Belge, one of Frances largest cooker manufacturers, you will have a friend in the kitchen for life.

Franco Belge also produce the 170 range of wood and solid fuel central heating cookers which provide enough central heating for up to 15 radiators.
